Art Unit: 1772

RESPONSE TO AMENDMENT

- 1. Claim 11-20 are pending in the application. Claims 1-10 were cancelled in the response filed on January 20, 2004.
- 2. Amendments to claims, filed on January 20, 2004, have been entered in the aboveidentified application.

WITHDRAWN REJECTIONS

3. The objection to claims 11-20, made of record in paper #6, mailed October 22, 2003, page 2, paragraph #2 has been withdrawn due to Applicant's amendment in the response filed on January 20, 2004.

REJECTIONS REPEATED

- 4. The 35 U.S.C. §103 rejection of claims 11, 12, 14-17, 19 and 20 as over Shi et al. (US Patent No. 5,693,962) in view of Forrest et al. (US Patent No. 5,707,745) is repeated for reasons previously made of record in paper #6, pages 2-4, paragraph #4.
- 5. The 35 U.S.C. §103 rejection of claim 13 as over Shi in view of Forrest and further in view of Campos (US Patent No. 6,278,237) is repeated for reasons previously made of record in paper #6, pages 4-5, paragraph #5.
- 6. The 35 U.S.C. §103 rejection of claim 18 as over Shi in view of Forrest and further in view of Chen et al. (US Patent No. 6,127,693) is repeated for reasons previously made of record in paper #6, page 5, paragraph #6.

Art Unit: 1772

Claim Rejections - 35 USC § 112

- 7. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 8. Claims 11-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In the instant case amended claims 11, 12, 17, 18 and 20 contain(s) the limitations "second electrode layer," "third electrode layer," "forth electrode layer" The specification does have support for these terms, therefore this limitations are considered new matter.

The attempt to simplify the claim language to read better is greatly appreciated, but at the current time the specification does not support the use of these terms. Applicant is reminded that the figures can be used to support changes in the claims and the specification. Furthermore, Applicant should use the same terms in the specification as in the claims for clarity.

ANSWERS TO APPLICANT'S ARGUMENTS

9. Applicant's arguments in the response filed January 20, 2004 regarding the 35 USC 103 rejection of record have been carefully considered but are deemed unpersuasive.

Applicant argues that there is nothing in Shi that would lead one of skill in the art to replace the subpixels with the RGB pixel of Forrest. The examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either

Art Unit: 1772

in the references themselves or in the knowledge generally available to one of ordinary skill in the art. In this case the motivation comes from Forrest not Shi. As stated in the previous office action; it would have been obvious to use Forrest's RBG pixel as the first, second and third pixels in Shi because the RBE pixel allows for three colors from the *same pixel* and is highly reliable, compact, efficient and requires low drive voltages for utilization in RGB displays (*see Forrest's summary of the invention*).

Applicant further argues that even if one of skill in the art was led to combine the teachings of Shi and Forrest, one would not arrive at the present invention. Specifically Applicant argues that the cells of the present invention contain different numbers of layers of organic materials etc. Applicant's claim 11 recites "a matrix arrangement *comprising*" Since Applicant uses the transitional phrase "comprising" which is open language, the fact that individual cells have more layers than claimed by Applicant is irrelevant. The fact each cell contains the claimed layers.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 1772

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alicia Chevalier whose telephone number is (571) 272-1490. The examiner can normally be reached on Monday through Friday from 8:00 am to 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon, can be reached on (571) 272-1498. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
